

Robust™

# Robust™

Comfortable seating for generously proportioned users

High back heavy duty multi-tilter with headrest

Medium back heavy duty multi-tilter

Robust™ was specifically designed for generously proportioned people who require ergonomically sound seating solutions and rugged durability. Each component was created to provide exceptional strength and tested to exceed normal seating standards so a larger user can be assured of its structural integrity, durability, safety and function.

Arms are made from steel, not plastic. Steel base is larger in diameter to provide extra stability. Casters are far superior and the mechanism was specifically designed for this weight category. No stone was left unturned in seeking to provide larger users with an exceptional and comfortable product that will stand the test of time.

Seating shown in Imprint, Graphite.

# Robust™

Robust has a two-tone fabric combination as standard. The borders along the seat, back and headrest and the “wing design” on the edge of the seat and back are always upholstered in Black. The remainder of the seat and back are upholstered in customer chosen fabric, vinyl or leather.

For 24 hour settings and high traffic areas, Global recommends selecting textiles that surpass 100,000 double rubs on the Wyzenbeek fabric durability tests.

# Robust™

## It's in the details

Optional ballistic nylon outer back for extra impact protection in high traffic areas

Standard with Ultracell high density, highly resilient foam for extra longevity and durability

Steel back support upright is 3" wide and 0.25" thick for extra durability and strength

Extra wide back (high back model with headrest is also available)

Solid steel loop style arms, vinyl dipped for comfort are width adjustable up to 1.5" on each side allowing for space between arms from 25.25" to 28.25"

Seat height control features heavy duty bariatric pneumatic cylinder rated for up to 750 lbs.

For extra comfort, Robust features a contoured seat with extra padding and sewn seat borders

For infinite seat angle adjustment, rotate knob to change seat angle

Side activated tilt tension is easy to reach and adjust from a seated position

Back angle adjustment allows user to change back angle to suit body shape

32" diameter heavy duty six-leg welded steel base for increased weight capacity, stability and safety

Tilt lock control allows user to lock the chair's tilting action

Six legs ensure two legs are always behind user

Large diameter 3" casters each rated for 225 lbs. provide easy mobility

**Active weight capacity is up to 500 lbs.**
