

KARIZMA™

A management chair that supports your every move

true response™
SUPPORT SYSTEM

2761-4LM High Back Tilter

The human body was designed to move, it was not intended to sit in a static position facing a computer screen. Movement contributes to good blood flow, properly lubricated joints, feeding spinal disks and ultimately makes us comfortable, alert, healthier and more productive in our activities. Karizma's True Response™ Support System was designed to encourage movement and to automatically adjust to your body's seated position, personal preferences and body scale.

Arched Polished Aluminum Spider Base

Polished Aluminum Arm & Back Frame

Karizma's unique "True Response" support system adjusts automatically to follow the user's body movements. The backrest of Karizma is attached with three elastomeric bushings located in the middle of the lumbar area. The bushings are mounted in a triangular pattern allowing the backrest to flex and move in any direction. This allows the back to respond and adjust to any user's movement. No matter how you sit in this chair, the backrest will always be in full contact with your back, offering full support, yet freedom of movement.

KARIZMA™

Karizma is an elegant management chair available in fabric, vinyl or leather. The perfect chair for executive or boardroom applications.
